RPLD030 LED360 Cone Caps
Push on threaded caps for magnetically attaching LED360's

LED360's can be used as additional delineation during the use of traffic cones or in some cases in place of traffic cones.

With 8 choices in light patterns you can choose the most suitable one. Via a button control, set the LED360™ on / off and make the choice of the light pattern. By pressing 2 seconds the LED360 switches off and will start again in the last chosen light pattern.

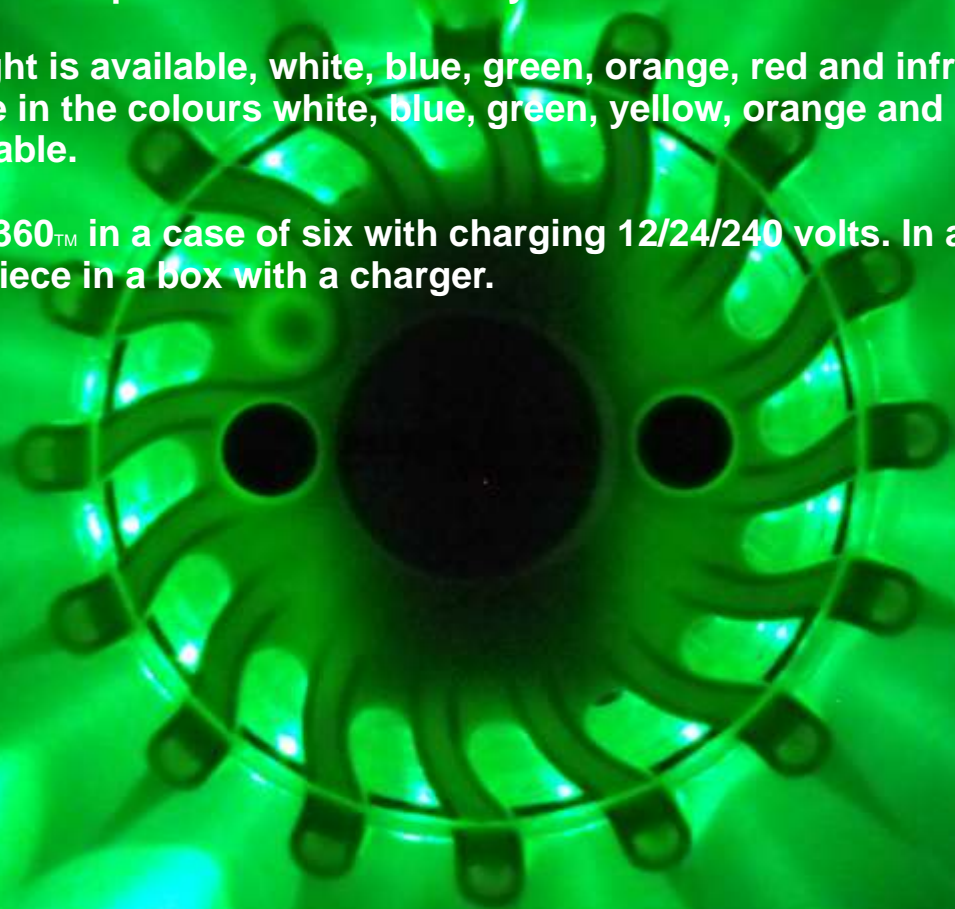

The visibility is enormous and is 800 metres on the road to 1500 metres on water / air.

The LED360™ is waterproof, floating can be secured with a pin or cable through the eye.

Also, the LED360™ has a magnet, this makes it easy attaching to metal parts. The LED360™ is pressure proof a truck can easily drive over.

In 6 colours LED light is available, white, blue, green, orange, red and infra red. The outer shells are in the colours white, blue, green, yellow, orange and military green available.

We deliver the LED360™ in a case of six with charging 12/24/240 volts. In a bag with 6 pieces or 1 piece in a box with a charger.
